Walcha's

Open Air Gallery of sculptures and artworks

38

Take a walk around the streets and along the river to see sculptures and artworks by local, national and international artists.

Walcha's Open Air Gallery

In 1996, Walcha Council was approached by Stephen King, a local farmer and sculptor, to collaborate with him to create a fountain sculpture for McHattan Park in the centre of town.

The decision to accept his offer and install Walcha's first sculpture lead to the suggestion by Council to form the Walcha Arts Council to facilitate an ongoing public art program. A plan was conceived and drawn up by the Walcha Arts Council and was adopted by Council into its 1998 Management Plan. The concept came to be known as the Open Air Gallery.

By 2001, with the financial support of Walcha Council and other funding bodies and a strong and dedicated resource base of accomplished local artists to implement the plans, Walcha Arts Council had established over 25 sculptures and public artworks in the Open Air Gallery.

In 2003 an exhibition of Walcha's art was held in Sydney and in an essay written for the catalogue, the art critic John McDonald wrote:

"Walcha has found a way of signposting its continued vitality. For a modest investment of ratepayers' funds, the Council has given the town a special place on Australia's cultural map. This has come about with the assistance of artists and supporters who have donated a great deal of time and expertise to create this unique facility. It is an example of many individuals working together for the good of a community in which they share strong family and sentimental ties."

1. "Weather Signs" – Stephen King, Walcha: 1996
